

A close-up photograph of a lush green cornfield, with the leaves of the corn plants filling the frame. The lighting is bright, highlighting the texture and color of the leaves.

The Arysta LifeScience Product Portfolio for Corn

At Arysta LifeScience, our goal has always been to bring you products that add true value to your business. Our portfolio for the corn market offers integrated solutions that can help take you successfully from planting to harvest.

FORTIX FUNGICIDE

A highly systemic, fast-acting strobilurin combined with the longest-lasting triazole for season-long fungicide benefits with one early application and total application flexibility – apply by ground or by air.

Zolera FX FUNGICIDE

A heavy-duty combination fungicide with two active ingredients delivered at full rates for maximum performance and yield in corn. Preventative and curative activity, with residual soil activity for root-to-tip protection. For maximum yield benefits, apply at VT.

Evito FUNGICIDE

Highly advanced, highly systemic fungicide with quick uptake and residual soil activity for long-lasting disease control in corn. In-furrow application controls soil-borne fungal pathogens like Rhizoctonia root and stalk rot.

Comite II MITICIDE

Proven protection against destructive mites in corn with contact and residual activity up to four weeks at full label rates. Easy on beneficial insects.

Application Rates and Timing
